

Liberty High School Wins Jim Weber Chevrolet

Pledge To Be A Safe Driver

On November 4, 2017, Liberty High School was awarded \$10,000 from Jim Butler Chevrolet for having the most pledges. Since about April of 2016, we encouraged students, teachers, and parents to take the pledge to be safe drivers. We were also awarded a free concert by Greek Fire (date to be determined) as another incentive to winning. Moon from 105.7 the Point helped promote the safe driving pledge program as well.

At Liberty, we strive to include our community in events and create a safe environment for our students and community members. We had parents helping to promote and share our goal of safe driving pledges via social media forums. Our staff members encouraged our students to pledge as well. In my course, we discussed in detail what safe driving looked like and what it meant to the students. We also have a student that has made it her mission to encourage her peers to buckle up, put down their phones, and to be safer drivers by doing monthly safety checks as students leave or come to school. Liberty worked hard to win this award and it took the efforts of everyone in the community.

Accepting this award was a true blessing and will allow us to further enhance our academic programs. We are only had three grade levels the previous school year, and we have our first graduating class this year. So, we had fewer students than a lot of local schools participating in the pledge challenge. We have not decided what to use the funds for specifically at this time. We plan on doing something that will help enhance the school and be of use to the community.
